DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/16/03 has been entered.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jane Licata on 2/27/04.

The application has been amended as follows:

Claim 1 has been replaced with the following:

Art Unit: 1635

-- 1. A compound 8 to 50 nucleobases in length targeted to a region consisting of nucleobases 1000 through 1092 of a nucleic acid molecule encoding human Interferon gamma receptor 2 (SEQ ID NO. 3), wherein said compound is an antisense oligonucleotide which comprises at least one modified internucleoside linkage and wherein said compound specifically hybridizes with said region and inhibits the expression of human Interferon gamma receptor 2. --

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The Examiner's amendment limits the claim to a targeted region consisting of nucleobases 1000-1092 (rather than any region encompassing nucleobases 1000-1092, such as the entire open reading frame). Furthermore, the claim sets forth the limitation that the compound is an antisense oligonucleotide which comprises at least one modified internucleoside linkage and wherein said compound specifically hybridizes with said region and inhibits the expression of human Interferon gamma receptor 2. There is no prior art which anticipates or makes obvious such an antisense oligonucleotide targeted to nucleobases 1000-1092 of human the human Interferon gamma 2 receptor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Eric Angell whose telephone number is (571) 272-0756. The examiner can normally be reached on M-F (8:00-5:30) with every other Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John L. LeGuyader can be reached on (571) 272-0760. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
